

# HARNESSES AND CABLES FOR CAR KIT INSTALLATION

Dear Customer,

Thank you for choosing our plug-n-play bluetooth cable solution, we are happy to bring you the most interesting and comprehensive harness choice on the market. The uniqueness of our cables is that they are modular, allowing to use the same solution for a variety of handsfree car kits from various manufacturers. In addition, we are covering a lot of higher end preamplified cars, including BOSE stereo systems, that most other harness manufacturers do not have time, desire or expertise to approach. Our harnesses add convenience and value to any installation - not only people who did not consider an installed product before because they lease or are afraid of losing a factory warranty are now safe to enjoy the best in handsfree, but installers now are able to spend many fold less time and effort on the same installation, without any loss of revenue.

We offer over 350 harnesses, including extensions, covering over 1,200 cars from over 90 car manufacturers for the last 20 years, and while we may not have a solution for every vehicle, we will provide the widest possible selection, covering most of the vehicles on the market.

The harnesses in stock are marked by GREEN background color. Whenever you see a harness number on the yellow background, it means this harness has been developed and is coming soon. If the harness has not been tested on a car yet, but we think we may have it, it is shown with a "?" mark. If we know the solution for a particular car does not exist, you will see "N/A" sign. "U.D.V." means Under Development. Pictures of almost every harness are available by request.

## HOW TO USE THE TABLE

Go to **Car Compatibility** tab. Car brands are listed in alphabetical order, so please just scroll down to your car make and find a model and year. Make sure you know the kind of a radio installed in your car and find it in the RADIO column. Find the brand of the car kit you plan to install and cross reference it with your car row.

You may see a few 5 digit numbers in that cell, separated by semi columns - these are the harnesses you can use to install a car kit of this brand in your vehicle with your particular radio. The numbers will start with 68, 85 or 86. If you see this we recommend to use 85XXX or 86XXX solutions first - they are cheaper and if available will give you the same effect for less money. 85XXX cables are called *EgoMute* (see below) and will use only one front speaker for the phone call sound (with exception of 85123, 85125 and 85630 which will use 2 front speakers). 86XXX harnesses are called *ISO4CAR* and they will use 2 front speakers.

In case there are only 68XXX series harnesses showing in the corresponding cell, you will have to use either an *TelLead* or a *Easy Mute* harness. These harnesses are more expensive and have to be used with Car Kit specific Adapters that you will find on the **Car Kit Compatibility & Adapters** tab. Please, find the particular brand and model of the car kit you want to install and see what adapter corresponds to it. Your order will thus include an *TelLead* or an *Easy Mute* harness as well as an adapter to your particular handsfree kit.

Sometimes the harness needs to be connected to the amplifier in the trunk of the vehicle. In this case, in order to run the wiring to the front of the car where the car kit or the car kit controls are. In this case, the harness may have to come with an extension cord and you will see something like 68XXX + 68899 in the corresponding cell.

If you want to have your kit working with your steering wheel controls, please look up compatibility and availability on the **Steering Wheel Controls** sheet.

The pricing is available on the **Price-List** sheet. Retail customers will also find the ordering procedures there.

If you have any questions please contact us at sales@pac-audio.com

These are the types of harnesses we are happy to offer:

**EASY MUTES**

(aka Drive & Talk Mute)

These are the most complicated and expensive solutions. They often work with preamplified car radios, including many fiberoptic models, without built-in Mute function. *Easy Mute* solutions are universal, allowing for use on non-amplified vehicles as well. *Easy Mute* must be coupled with Car Kit Adapters, working with a particular kit you are installing, so when calculating your cost please add the prices of *Easy Mute* Harness and Car Kit Cable Adapter. See the list of cables on Interface and Car Kit Compatibility tab. *Easy Mute* solutions for Hi-Fi and Premium stereos are more expensive.

**TELLEADS**

(aka Interface Lead)

These are harnesses allowing a direct connection to a car radio with Telephone-In function. *TelLeads* will usually allow you to utilize the car radio or steering wheel controls to adjust the volume. *TelLeads* can be used with regular, pre-amplified and even Hi-Fi stereos such as BOSE, but they can only work with some radios with Telephone inputs, so availability is not great, but gets better. Just like *Easy Mute*, *TelLead* must be coupled with a Car Kit Adapter, working with a particular car kit you are installing, so when you are calculating your cost add the prices of an *TelLead* and a Car Kit Adapter. See the list of Car Kit Adapters on Car Kit Compatibility & Adapters page.

**ISO4CAR**

(aka ISO2CAR)

These are simple cables allowing to connect hands-free car kits with ISO connectors (*Parrot*, *Bluetouch*, *Visteon*, etc.) to car specific radios, mostly without pre-amplifiers.

**EGOMUTE CABLES**

(aka Xpress Mute)

These are simple cables allowing to connect *Raytel Telephone* and *funkwerk Ego* hands-free car kits to car specific radios without pre-amplifiers. Please note that on some cars *Raytel/FwD* car kit will only mute 1 speaker and the sound of the call will come from the front passenger side speaker. If thi is the case you may use *Easy Mute* or *TelLead* harness.

**EXTENSION CABLES**

Should you need to run an extension from the rear based amplifier to the front of the car, we have ready to install solutions for you. From power extensions to LCD extensions, nothing is left out. If in the table you see something like 68450 + 68899 it means the harness comes with the extension cord and the price of it will be calculated based on combined prices.

**CAR KIT ADAPTERS**

Car Kit specific adapters used with the *Easy Mute* and *TelLead* harnesses.

**RETURN POLICY**

Because car manufacturers often do very strange things, we can not guarantee that the cable you've ordered will fit a particular car. Should this happen and we will not be able to find an alternative solution, we will gladly accept returned cable in a new condition and issue a full refund

**We would love to hear from you not only about the bad, but also about the good experience with our harnesses. Please, spend 2 minutes to shoot an e-mail to [sales@pac-audio.com](mailto:sales@pac-audio.com) to help us assure other customers and professionals that the harness you used was good and will fit their vehicle perfectly.**

New harnesses are being added all the time and we will keep you posted on updates. Pricing and availability are subject to change without preliminary notice.
